

9V Band Plan

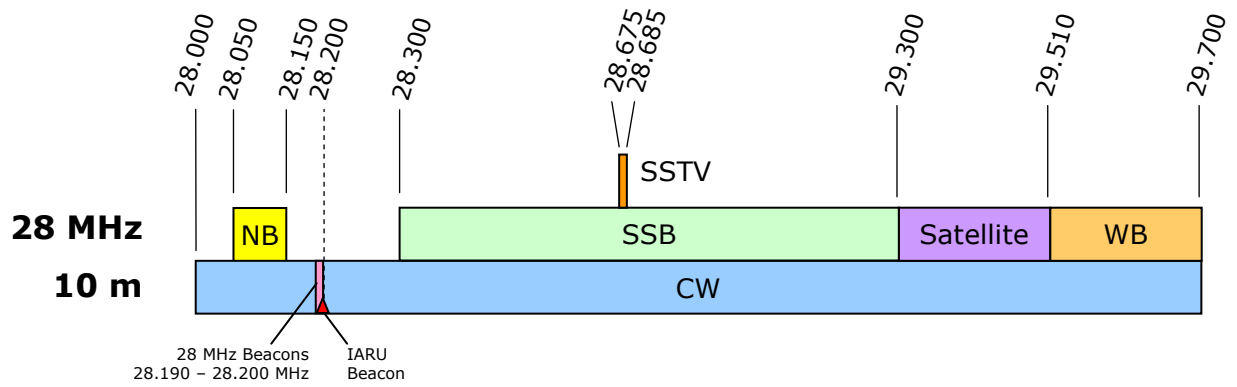

Updated 15 April 2015

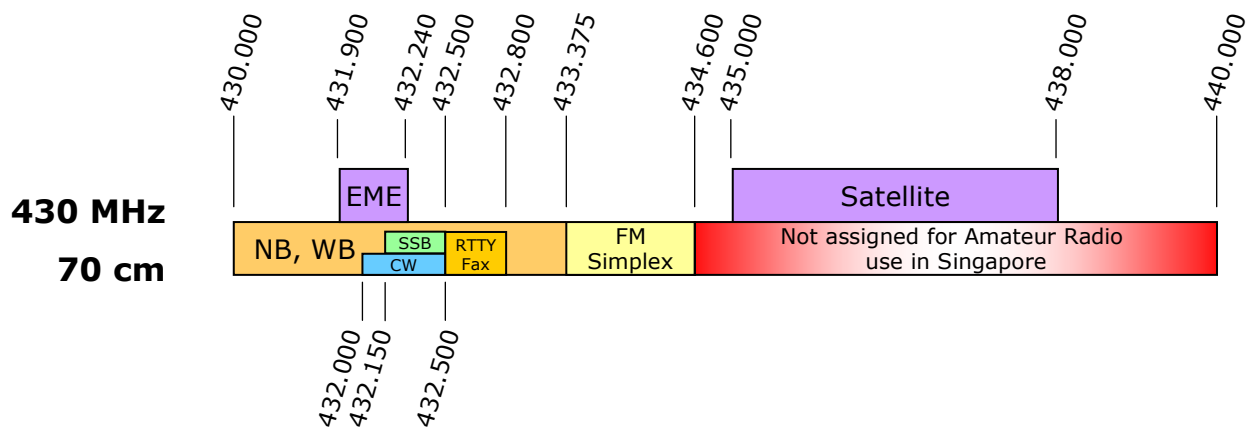

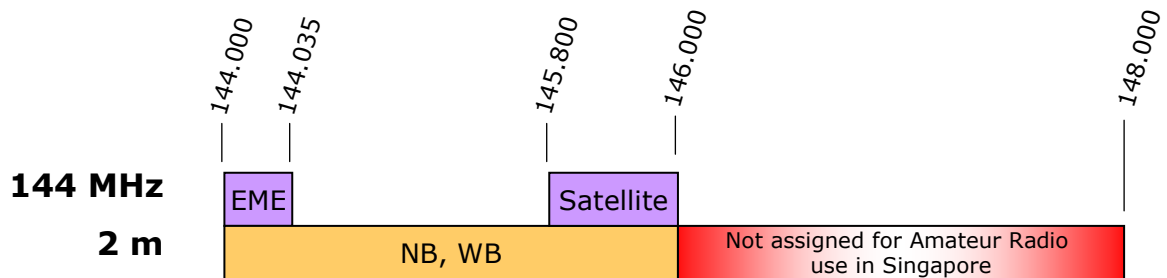

It is recommended that the sub-band for Data Modes be from 14.070 MHz to 14.112 MHz (with a ± 0.5 kHz guard band for the 14.100 MHz beacon), and within that data sub-band, traditional data modes may continue up to 14.095 MHz, with 14.095 to 14.112 MHz being reserved for other data modes including Packet.

The Guard Band for IARU and 28 MHz Beacons is ± 0.5 kHz

Legend

NB: Narrow band modes including Digital modes not exceeding 2 kHz

WB: Wide band modes including FM
